EDUCATION

Haute École d'Informatique (HEI)

B.S. in Computer Science — GPA 3.2

Expected Graduation: June 2027

Software Engineering · Data Analytics · Business Intelligence
Database Systems · Software Architecture · Cybersecurity
Computer Networks · Applied Mathematics

WORK EXPERIENCE

NUMER - BACKEND DEVELOPER APPRENTICE

September 2025 - April 2026

- Developed and maintained backend features for Vola, Numer's payment platform managing tuition payments at HEI Madagascar.
- Built a disaster recovery feature enabling automated payment regeneration in case of platform failure.
- Contributed to the integration of Vola into HEI Madagascar's information system.
- Designed and maintained REST APIs.

Tech: Java · Spring Boot · PostgreSQL · REST APIs · Git · AWS Monitoring

Manager: Dr Fonenantsoa (Lou) Maurica - CTO of Numer

MA-ERI CONSULTING - FULL-STACK DEVELOPER (CONSULTANT)

March 2025 - present

- Built and deployed the company's official website with Google indexing setup.
- Integrated Resend email service for automated quotation request workflows.
- Developed internal web applications supporting business productivity.
- Contributed to company branding and digital visibility.

Manager: Léonce ANDRIAMAMIVONY (Co-founder)

PROJECTS SELECTION

– **UnFaked** — AI-Powered Misinformation Detection Platform
2nd Place — Google Developer Group Hackathon 2025

- Integrated Google Fact Check API for real-time information verification.
- Implemented image analysis using TensorFlow and the COCO model to detect manipulated content.
- Developed end-to-end web platform for misinformation detection and content analysis.

Tech: Next.js · TensorFlow · Computer Vision · Google Fact Check API

– **Face Me** — Computer Vision Application

- Built a real-time face detection and image analysis application for the web.

Tech: Next.js · TensorFlow

– **Ilona** — AI Call Center Agent

- Developed a voice-based conversational assistant automating customer interactions.
- Implemented speech synthesis and multi-turn conversational workflows.

Tech: Next.js · ElevenLabs · AI Agents

SKILLS & LANGUAGES

- Web Application Design and Development
- Backend Architecture and REST API Development
- Artificial Intelligence and Conversational Agents
- Computer Vision and Image Analysis
- Data Modeling and Relational Databases
- Project Management and Team Collaboration
- Malagasy (Native), French (Fluent), English (Professional Working Proficiency)

ACHIEVEMENTS

- 2nd Place — Google Developer Group Hackathon 2025 — Project: UnFaked
- 2nd Place — HEI Hackathon — Project: Skill AI (Solo)
- picoCTF Cybersecurity Training — Carnegie Mellon University Africa
